» Passive cooled
» Light weight durable aluminum

KISS DA225
KISS Disk Array

Designed to fit inside the space of a standard 5.25" drive bay, the new KISS DA 2.5" Disk Array is a unique drive cage solution that can accommodate up to 2x 2.5" SAS or SATA hard drives. Thus the 2.5" KISS DA can be easily deployed in many KISS Industrial Servers. Because of its compact form factor, it also fits nicely into our KISS 2U system. The KISS DA225 is constructed in light weight durable aluminum. The back plane connections include both SAS and SATA connectors and each drive drawer is equipped with power and drive access LEDs. The drive drawer is

designed to accommodate any standard 2.5" SATA devices including 2.5" SSD or regular CF media. The hard drives/ SSDs can be set up in various configurations: as RAID 0, RAID 1, RAID 5 or JBOD, as individual drive, or whatever the mix that best fits the application. The Disk Array can start with as little as one hard drive and can then expand as needed. Hard Drives can also be removed or added to the system without turning off your system power or restarting your computer.

Technical Information

Interface	SAS, SATA
Construction Material	Heavy duty cold solled steel
Hard Drive Type	SAS/SATA 3G/6G 2 in 1 Backplane
Maximum Number of Drives	2x 2.5"
Maximum Drive Height	14 mm (supports 12.5mm hard drives)
Maximum Data Transfer Rate	6/3G
Power Connection	One 4-pin Molex power connector
Connections	Two 7-pin SATA connectors, two 7-pin SAS connectors
LEDs	Power and Drive Activity LEDs for each drive drawer
Lock	Key lock for each drive drawer
Hard Drive Connection	Point to point, no cable required for installing hard drive into drive drawer
Cooling System	Passive cooled
Weight (with no hard drive)	1.54lb (0.7KG)
Dimensions (L x W x H)	185 x146 x 42 mm
